

EDUCATION

University of Waterloo

Sep 2020 - Apr 2025

Bachelor of Software Engineering (BSE) - 4A/4B Term

3.5/4.0 cGPA

- Courses: Operating Systems, Concurrency, Data Structures and Algorithms, Software Engineering Principles, Database Management, Computer Networks, Intro to AI Machine Learning, Advanced Networking

TECHNICAL SKILLS

Languages | JavaScript, TypeScript, HTML/CSS, Python, C/C++, Java, Kotlin

Frameworks | React, React Native, NodeJS, NestJS, ExpressJS, Angular, GraphQL, REST APIs, Expo, Ruby on Rails, Firebase, Git

Databases | MySQL, PostgreSQL, MongoDB

EXPERIENCE

Auvik Networks

Jan 2024 - Aug 2024

Software Engineer Intern - SaaS Team

- **Enhanced customer experience and trust** by implementing **ReactJS** and **NodeJS**-based SSO integration, enabling secure access for **2,500+** clients and increasing platform adoption by **35%**
- **Architected and delivered** E2E solution for application notes and tagging system using **NodeJS** and **PostgreSQL**, reducing network latency by **60%** and delivering smoother user experience
- **Achieved runner-up** at a company hackathon by integrating Claude AI to rapidly prototype a summarization tool, demonstrating agile innovation and enhancing the platform's competitive edge

SAIRYŌ

May 2023 - Aug 2023

Software Engineer Intern

- **Engineered high-performance GraphQL endpoints** that reduced API response times by **45%**, dramatically improving platform responsiveness and 30-day user retention by **15%** as measured by analytics
- Rebuilt web portal with **Angular** and **TypeScript**, greatly improved user experience, demonstrated from **40%** increase in event bookings and **25%** higher donation conversion for **50+** artists

Skyview Suites

Sept 2022 - Dec 2022

Software Engineer Intern

- **Revamped admin dashboard UI/UX** using **ReactJS** and **TypeScript**, enabling efficient management of rental services for **1,000+** daily users and cutting administrative time by **30%**
- **Designed and implemented RESTful API architecture** with **NestJS** and **PostgreSQL**, establishing core logistics infrastructure that processes **5,000+** daily transactions
- **Led microservices migrations** for core business functions including booking and invoicing, leveraging **RabbitMQ** and **AWS ECS** to reduce service latency by **45%** at **P99.9**

Archipelago Genomics

Jan 2022 - Apr 2022

Software Engineer Intern - Mobile Team

- **Launched market-ready fitness application** from concept to deployment using **Expo** with **React Native** and **Firebase**, acquiring **250+** users within two months and earning **4.7/5** star rating
- **Drove 35% increase in user retention** by implementing data-driven UI improvements based on user interviews and **Figma** prototyping, directly contributing to product-market fit

Sponsorpulse

May 2021 - Aug 2021

Software Engineering Intern

- **Created high-performance RESTful API** with **Ruby on Rails** that decreased property report generation time by **65%**, empowering customers to make more informed decisions with real-time data
- **Executed platform redesign** using **ReactJS**, **Ruby**, and **Figma** that connected **200+** users to **20,000+** brands, increasing user engagement metrics by **42%**
